Key words: partial anomalous pulmonary venous connection, non-fibrotic hypersensitivity pneumonitis, pulmonary hypertension.

Supplementary Table 1. Hemodynamic measures obtained during right heart catheterization.

Measured variables	Value
Right atrial pressure, systolic	22 mmHg
Right atrial pressure, diastolic	18 mmHg
Right atrial pressure, mean	15 mmHg
Pulmonary artery pressure, systolic (sPAP)	120 mmHg
Pulmonary artery pressure, diastolic (dPAP)	50 mmHg
Pulmonary artery pressure, mean (mPAP)	73 mmHg
Pulmonary artery wedge pressure, mean (PAWP)	11 mmHg
Cardiac output (CO)	7.7 L/min
Calculated parameters	
Pulmonary vascular resistance	8.7 wood unit (WU)
Cardiac index	4.8 L/min/m ²
