This is a retraction of the article "Prescription analysis emphasizing on medication adherence of antibiotics for lower respiratory tract infection" (<https://doi.org/10.4081/monaldi.2023.2527>) published on August 7, 2023.

Due to a copyright claim that arose after the publication of our study on the MMAS-8 scale by the family descendants of Dr. Donald Morisky (inventor of the MMAS-8 scale), our self-funded research team cannot afford the overpricing of Retroactive Licensing. With much regret, we find ourselves in the position of retracting our study from publication.
